

Registration for MyMedicare:

We are pleased to invite you to register for MyMedicare, a new patient registration model in Australia. Registration is free and voluntary for all patients holding a valid Medicare card or a Department of Veterans Affairs (DVA) card.

MyMedicare aims to strengthen the relationship between patients, their general practices, general practitioners (GPs), and primary care teams. By registering for MyMedicare, you will gain access to a range of benefits and may be eligible for additional services. Please note that these services can only be accessed by registering your preferred clinic with Medicare. Registrations will open on October 1, 2023.

The MyMedicare program offers several advantages that can enhance the quality and efficiency of healthcare:

- **Improved Access to Healthcare:** MyMedicare facilitates easier and more efficient connections between patients and their GPs, as well as other healthcare providers.
- **Better Coordination of Care:** This initiative enhances the coordination of care among different healthcare providers, leading to improved outcomes for patients.
- **More Personalized Care:** MyMedicare allows healthcare providers to offer more personalized care by providing them with comprehensive information about patients' medical histories.
- **Increased Patient Engagement:** MyMedicare empowers patients to take a more active role in their healthcare by granting them greater control over their Medicare information and facilitating easier communication with their healthcare providers.

We encourage you to take advantage of this opportunity. For more information or assistance with the registration process, please feel free to contact our office.
